

Supriti Ghosh

SOFTWARE ENGINEER II · NETAPP INC

Pittsburgh, PA 15232, USA

☎ (+1) 515-735-5090 | ✉ supriti.ghosh@netapp.com | 🏠 supritighosh.github.io | 📷 supritighosh | 🌐 supritighosh

Summary

I am a Software Engineer II at NetApp Inc. I completed my MS in computer science from the University of South Dakota. I worked as a data analyst intern at NAMI (National Alliance on Mental Illness) Central Iowa. Also, I worked as a Machine Learning Engineer in the Computer Science Department and as a Software Engineer in the Biomedical Engineering Department at the University of South Dakota.

Professional Experience

NetApp Inc 🏠

SOFTWARE ENGINEER II

Cranberry Township, PA 16066

June 2022 - Present

- Working on Data Management in Hybrid Cloud.

University of South Dakota 🏠

GRADUATE RESEARCH ASSISTANT, BIOCOMPUTATIONAL BIOLOGICAL ENGINEERING LAB, BIOMEDICAL ENGINEERING

Vermillion, SD 57069

January 2022 - May 2022

Software Engineer:

NLP Applications: Designed NLP applications using **Python** to automatically categorize data. Used effective text representations to transform natural language into useful features. Trained and developed NLP models and evaluated them for deployment.

Web Applications: Designed and developed web applications using **JavaScript, ReactJS, SailsJS, GraphQL & Elastic Search** to analyze and process data. Ensured applications security and ability to interact with multiple APIs and databases.

GRADUATE RESEARCH ASSISTANT, 2AI: APPLIED ARTIFICIAL INTELLIGENCE RESEARCH LAB, COMPUTER SCIENCE

January 2021 - December 2021

- Machine Learning (ML) Engineer:** To screen Covid-19, used **Python, TensorFlow, Keras, scikit-learn, Convolutional Neural Networks**. For the purpose of data visualization, used **Matplotlib & Tableau**. [\[GitHub\]](#)

DNN in Chest X-ray to screen Covid-19: Implemented neural network on the balanced dataset to prevent from possible bias. Collected 10k chest x-rays to implement binary classification (Covid-19 vs Non-Covid-19). Used the different pre-trained models of deep learning to compare the performance. Generated lung segmentation and heatmap to screen and localize interpretable abnormalities.

CheXNet to screen Covid-19: Implemented CheXNet on a dataset of 4.6k to screen Covid-19 using chest X-ray images. CheXNet is initially designed for radiologist-level pneumonia detection in chest X-rays (CXRs). Implemented feature extraction technique using deep learning which showed success in identifying Covid-19. [\[Publication\]](#) [\[Presentation\]](#)

Literature Review of Covid-19 Screening Algorithms using Chest X-rays: Reviewed 50 peer-reviewed papers and compared the results for screening chest X-rays. Also collected their datasets and compared performance with relation to the size and quality of data. [\[Publication\]](#)

Coursera 🏠

MENTOR, DEEPLARNING.AI

Remote

August 2021 - June 2022

- Mentored & guided learners from all over the world with their problems and professional paths.
- Communicated with course instructors regarding problems. Answered general questions & discovering new ideas by actively participating in Discussion Forums.

NAMI (National Alliance on Mental Illness) Central Iowa 🏠

INTERN, DATA ANALYST

Ames, IA 50010

March 2020 - November 2020

- Interpretation of data to analyze results using statistical training. Also developed and implemented data collection systems.
- Optimized statistical efficiency and quality. Filtered and cleaned data by reviewing reports using **Python**.
- Developed web platform with **PHP** and worked with management to prioritize business and information needs.

Jahangirnagar University 🏠

RESEARCH ASSISTANT, INSTITUTE OF INFORMATION TECHNOLOGY

Dhaka, Bangladesh

January 2016 - December 2017

- Project: Identify Fingerprint Using Minutiae Matching in Biometric Security System** · This project presents a new method of identifying fingerprints in biometric security systems because the fingerprint is one of the best examples in biometric security and it can identify the personal information and it is much more secure than any other biometric identification system. The experiment was performed in **Matlab & SQL**. The experimental result exhibits the performance of the proposed method. [\[Publication\]](#) [\[GitHub\]](#)

Education

University of South Dakota (USD)

MS IN COMPUTER SCIENCE

Vermillion, SD 57069

January 2021 - May 2022

- CGPA:** 3.8/4.0, **Thesis:** Deep Features to Analyze Pulmonary Abnormalities in Chest X-rays due to Covid-19 [\[Dissertation\]](#) [\[Presentation\]](#) [\[GitHub\]](#), **Advisor:** Dr. KC Santosh
- Courses:** IoT & Security · Mathematics for Machine Learning · Seminar · AI in Medical Imaging · Design and Analysis of Computer Algorithms · Information Storage and Retrieval · Machine Learning Fundamentals · Advanced Artificial Intelligence

- **CGPA:** 3.71/4.0, **Project:** Identify and Recognize Person Using Iris Biometric Security System [[GitHub](#)], **Advisor:** Dr. Mohammad Abu Yousuf
- **Courses:** Advanced Database System · Probability & Stochastic Process · Advanced Digital Communication · Information Systems & Securities · Client Server Technologies & Cloud Computing · Advanced Mobile & Cellular Communication Technologies · Software Project Management & Quality Assurance · Geographical Information Systems · E-Commerce & E-Governance · Computer Vision & Image Processing

Jahangirnagar University (JU)

Dhaka, Bangladesh

- **CGPA:** 3.58/4.0, **Thesis:** Novel Method to Assess Motion Blur Kernel Parameters and Comparative Study of Restoration Techniques Using Different Image Layouts [[Publication](#)] [[GitHub](#)] **Advisor:** Dr. Mohammad Abu Yousuf
- **Courses:** Data Structures · Algorithm Analysis · Digital Logic Design · Object Oriented Programming · Operating System · Computer Architecture · Wireless & Mobile Communication · Computer Network Security · Database Management System · Differential & Integral Calculus · Complex Variable & Vector Algebra · Statistical & Probability Theory · Discrete Mathematics · Computational Mathematics · Simulation & Modeling · Electronic Devices & Circuits · Information System Analysis · Computer Network & Internet Technology · Signal & System · Software Engineering · Computer Graphics · Web Technologies · Microprocessor & Interfacing · Telecommunication System · Management Information System · Introduction to Bio-informatics · Artificial Intelligence & Neural Network · Parallel & Distributed System · Multimedia System & Application · Human Computer Interfacing · Digital Image Processing & Pattern Recognition · Mobile Application Development

Technical Skill

Programming Language	C, C++, Java, Python, C#
Machine Learning	Scikit-learn, Keras, TensorFlow, PyTorch
SE Practices	Agile Methodologies, Pair Programming, Scrum
Web Technologies	HTML, CSS, PHP, JavaScript, ReactJS, SailsJS, GraphQL, Elastic Search
Database	MySQL, Oracle, Microsoft SQL Server, Postgres, Tableau, Power BI
Frameworks & IDEs	Visual Studio, Netbeans, .NET, Matlab
Other Software Skills	Latex, GIT, Adobe Photoshop, Shell, CISCO Packet Tracer

Projects

Covid-19 Recognition in CT Scans using Artificial Intelligence (AI) guided tools

Python

COURSE PROJECT FOR ADVANCED ARTIFICIAL INTELLIGENCE COURSE [[GitHub](#)]

January 2022 - May 2022

- AI-guided algorithms have been utilized to screen CT scans for Covid-19 analysis. A total of 1,810 CT scan datasets have been collected for this project where 1,267 Covid-19 patients' and 543 healthy patients' CT Scans. The pre-trained models InceptionNet V3 and U-net have been used for training purposes. K-fold cross-validation has been used to verify a better model. Our main goal was to show which model can perform better to detect, localize and segment Covid-19 cases using CT scan images so that we can use one or two globalized models for Covid-19 analysis.

Neural Network

Python

COURSE PROJECT FOR MACHINE LEARNING FUNDAMENTALS COURSE [[GitHub](#)]

January 2022 - May 2022

- Used 400 images in total (200—200 - balanced data) in this project. Trained Neural Network with three different activation functions: a) linear, b) Sigmoid, and c) Tanh. Used k (=5)-fold cross-validation and computed the confusion matrix, precision, recall, and F1-score. Reported which kernel performs better of all.

Document Clustering

Python, scikit-learn, Matplotlib

COURSE PROJECT FOR INFORMATION STORAGE AND RETRIEVAL COURSE [[GitHub](#)]

August 2021 - December 2021

- In this project, used Python to cluster documents. At first, fetched Wikipedia articles and then represented each article as a vector. Performed k-means clustering to cluster documents and then evaluated the result.

Fake Job Detection

Python, NLP

DATA SCIENCE PROJECT [[GitHub](#)]

May 2021 - August 2021

- Used Python libraries to detect fake jobs. The dataset contains of 18k job descriptions where around 800 false job descriptions is also included. Used logistic regression model because it can be used when the dependent variable is binary and also the dataset has been used to train and classify suspicious job descriptions.

Sensor Data Analysis for Internet-of-Things

Python, esp32, Raspberry Pi 4

COURSE PROJECT FOR IOT & SECURITY COURSE [[GitHub](#)]

January 2021 - May 2021

- In this project, collected temperature and humidity data for continuously two hours on five different days using esp32, DHT11, MQTT, Raspberry Pi 4, breadboard and saved all the data in google firebase. For data plotting, used python libraries for line plotting, box plotting of temperature and humidity data and also line grid plots for three different days of temperature and humidity data. Then data has been pre-processed and linear regression models have been used for data analysis of MSE, AIC and also to plot the actual and predicted values.

IoT Big Data Management

PostgreSQL, Python

COURSE PROJECT FOR IOT & SECURITY COURSE [[GitHub](#)]

January 2021 - May 2021

- Used PostgreSQL to manage big datasets for Internet-of-Things in this project. Also used python to change the time format (UNIT time to dd-mm-yy) and after that, included 4000 rows of data in the PostgreSQL to store and process.

Identify and Recognize Person Using Iris Biometric Security System

Matlab, SQL

MASTERS PROJECT [[GITHUB](#)]

August 2016 - December 2017

- Used automated iris recognition for personal identification to verify both uniqueness of the human iris and also its performance as a biometric based system. The performance of research was measured for stored database which is scored 0% each for False Reject Rate (FRR) and False Accept Rate (FAR) and consequently, iris recognition is shown to be a precise and reliable biometric technology.

Hotel Management System

MySQL

COURSE PROJECT FOR INFORMATION STORAGE AND RETRIEVAL COURSE [[GITHUB](#)]

August 2021 - December 2021

- Designed a database for the hotel management system. In this project, created relations between customers, HR, services of the hotel etc. It would allow the hotel management to handle all hotel activities.

Final Result Processing System

C#, MySQL

SEMESTER PROJECT FOR SOFTWARE ENGINEERING [[GITHUB](#)]

July 2014 - December 2014

- In this project, developed an application software in C# entitled "Final Result Processing System" which is a desktop application where the teachers can insert students databases, calculate results and Grade Point Average. The teachers could log in and update the student databases and results. The mark would be calculated automatically and saved in this software for future use. The application is built through C#, MySQL and provides the flexibility to add, modify or recreate new results for students.

Library Management System

PHP, MySQL

SEMESTER PROJECT FOR DATABASE MANAGEMENT SYSTEM [[GITHUB](#)]

April 2014 - June 2014

- This is a web service based application where the list of books can be saved in the database. People can log in and can read books and can also hire or purchase books. The application is built through PHP & MySQL.

- 2020-2022 **Student Member**, Association for Computing Machinery (ACM)
2015-2016 **Student Member**, Institute of Electrical and Electronics Engineers (IEEE)

Certifications

SPECIALIZATION COURSES OFFERED ON [COURSERA](#)

- **Google Data Analytics Professional Certificate** · Google · [Continuing]
- Foundations: Data, Data, Everywhere · [Certification]
- Ask Questions to Make Data-Driven Decisions · [Certification]
- Prepare Data for Exploration · [Certification]
- Process Data from Dirty to Clean · [Certification]
- Analyze Data to Answer Questions · [Certification]
- Share Data Through the Art of Visualization · [Continuing]
- **PostgreSQL for Everybody** · University of Michigan · [Continuing]
- Database Design and Basic SQL in PostgreSQL · [Certification]
- Intermediate PostgreSQL · [Certification]
- JSON and Natural Language Processing in PostgreSQL · [Continuing]
- **Applied Data Science with Python** · University of Michigan · [GitHub] [Certification]
- Introduction to Data Science in Python · [GitHub] [Certification]
- Applied Plotting, Charting & Data Representation in Python · [GitHub] [Certification]
- Applied Machine Learning in Python · [GitHub] [Certification]
- Applied Text Mining in Python · [GitHub] [Certification]
- Applied Social Network Analysis in Python · [GitHub] [Certification]
- **Practical Data Science** · DEEPLARNING.AI & AMAZON WEB SERVICES · [GitHub] [Certification]
- Analyze Datasets and Train ML Models using AutoML · [GitHub] [Certification]
- Build, Train, and Deploy ML Pipelines using BERT · [GitHub] [Certification]
- Optimize ML Models and Deploy Human-in-the-Loop Pipelines [GitHub] [Certification]
- **Python 3 Programming** · University of Michigan · [GitHub] [Certification]
- Python Basics · [GitHub] [Certification]
- Python Functions, Files, and Dictionaries · [GitHub] [Certification]
- Data Collection and Processing with Python · [GitHub] [Certification]
- Python Classes and Inheritance · [GitHub] [Certification]
- Python Project: pillow, tesseract, and opencv · [GitHub] [Certification]
- **Python for Everybody** · University of Michigan · [GitHub] [Certification]
- Programming for Everybody (Getting Started with Python) · [GitHub] [Certification]
- Python Data Structures · [GitHub] [Certification]
- Using Python to Access Web Data · [GitHub] [Certification]
- Using Databases with Python · [GitHub] [Certification]
- Capstone: Retrieving, Processing, and Visualizing Data with Python · [Certification]

COURSES OFFERED ON [COURSERA](#)

- **Machine Learning with Python** · IBM · [Certification]

COURSES OFFERED ON [GOOGLE DIGITAL GARAGE](#)

- **The Fundamental of Digital Marketing** · Google · [Certification]

SYMPOSIUM OFFERED ON [JAHANGIRNAGAR UNIVERSITY](#)

- **CCNA Voice Primer**
- **Demystifying Neural Networks In-Vivo: A Computational Approach**
- **Database Design and Implementation with Web Application**
